## SmartShelf Antennas and FAKRA-2-FAKRA Antenna Cable

Kathrein Solutions has taken the known SmartShelf (SMSh) antennas to a new level and changed the connectivity to FAKRA connectors. These robust and vibration-resistant connectors, known from the automotive industry, are coded and snap into place with one click. This makes solutions for eKanban applications and point-of-sales acquisition even easier and, above all, more cost-effective.

- Kanban Application
- Point of Sales Verification
- Asset Registration
- Book-and-Collect Workstation

These robust and vibration-resistant connectors are coded and lock in place with a click.

- SMSh antennas are connected in seconds
- Reduces installation cost

## CB2 – Connection Boxes

Kathrein Solutions present the two new connection boxes, CB2-A (Advanced for DC, Ethernet and GPIO) and CB2-B (Basic for DC), for the installation of electrical components in the field, especially outdoors or for long-time installation.

- Connectivity for AC/DC supply
- DC circuit breaker for a defined switch-off
- Connectivity for Ethernet and GPIO
- IP66 protection class for outdoor use
- Suitable to connect the Kathrein GPIO and DC cable
