

Partner Presentation

Partner Logo	Partner Description
	<p>We are pco. We work together to develop the IT of Mid-size-businesses.</p> <p>Today, for small and medium-sized companies, IT means a lot more than it did at the time of our founding. That is why pco is now far more than a systems house for hardware and software: As a success partner of our customers, at pco we develop needs-based, pinpoint IT solutions contributing to the long-term economic advantage of companies.</p> <p>To this end, we are not afraid to think outside the box, we work with an interdisciplinary approach and bring together experts from a wide range of specialist fields in our lines of business to achieve an optimum overall outcome. Since our founding in 1984, we have been continuously developing and maintaining the highest certifications of the most renowned manufacturers. This long-standing know-how makes us one of the leading IT service providers in Northern Germany. Our strong team of currently more than 150 employees develops unique approaches combining consulting, system maintenance and the provision of IT services. True to our brand's credo: IT IST ALLES (IT IS EVERYTHING).</p> <p>In the field of digitisation, we have focused our activities on AutoID, RFID and systems integration for over 25 years. This essentially encompasses the digitisation of logistics processes and information in order to increase the added value through improved transparency in the workflow and more effective decision-making bases.</p> <p>The first and causal step in this digitisation process is the reliable and valid generation of data, e.g. by means of barcode scanners, RFID readers or RTLS tracking (indoor GPS) - one of pco's core competencies.</p> <p>Our process and project experience combined with the day-to-day business experience of the customer leads to pragmatic and target-oriented solutions. We support you from the first project!</p>
