

The protective cap set PCS-G3-IP67 (52010376) for the Kathrein RFID readers enables operation in IP67 environments, even if not all cables are connected. The protective cap set consists of 3x TNCrev protective caps for the antenna connections and 3x M12 protective caps for the reader connecting cables.

Please note that the readers can be damaged during continuous outdoor operation if moisture or rain penetrates via the unprotected ports. In this case, the device warranty will be void!

Order number 52010376

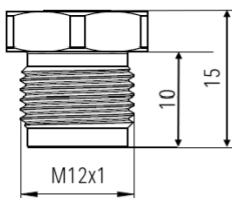

> **Features**

- For outdoor operation of Kathrein Reader even if not all cables are connected
- 3 Protective caps for TNCrev antenna ports
- 3 Protective Caps for the reader connecting cable
- Maximum configuration with 3 + 3 protective caps if the reader is supplied via PoE and no other cable is connected!

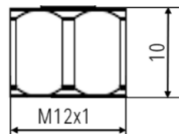

> **Usable with the following readers**
